

COVID-19 diagnostics

Tests for the detection of the new coronavirus and of antibodies against SARS-CoV-2

EURORealTime SARS-CoV-2

- CE-marked PCR test for specific detection of SARS-CoV-2
- Quick and simple pathogen detection by means of reverse transcription and real-time PCR in one step
- High sensitivity due to simultaneous detection of two different SARS-CoV-2 target sequences
- Only one reaction per sample

Order number: MP 2606-0100

Anti-SARS-CoV-2 ELISA IgA and IgG

- CE-marked test systems to support the diagnosis of COVID-19
- Sensitive and specific detection of antibodies against SARS-CoV-2
- IgG antibody detection: Suited for screening of large numbers of persons after contact with SARS-CoV-2 and for determination of possible immunity
- Ideal supplement to direct pathogen detection
- Use for collection of epidemiological data

Order numbers: EI 2606-9601 A (IgA), EI 2606-9601 G (IgG)
